

Trade and distribution cooperation between Argor Heraeus SA Switzerland and Finemetal Asia Ltd Hong Kong regarding physical precious metals in Hong Kong

Hong Kong im September 2013

Finemetal Asia and Argor Heraeus together offer physical precious metals (gold, silver, platinum and palladium) locally in Hong Kong since September 2013.

This cooperation between Argor Heraeus and Finemetal Asia as a liquidity provider for the CGSE, was initiated when Finemetal Asia was accepted as first international member by invitation by the renowned physical gold exchange CGSE (Chinese Gold and Silver Exchange Society) in Hong Kong, on 23 September 2013.

Finemetal Asia exclusively trades and distributes products of the renowned refinery Argor Heraeus in Hong Kong and Asia. In doing so, Finemetal Asia independently acquires customers interested in precious metals. After successful due diligence, undertaken by Finemetal Asia products of Argor Heraeus are exclusively traded and distributed. By implementing such a system, the areas of responsibility between producer, trader and distributor are clearly defined and attributed. Argor Heraeus is the LBMA certified producer and acts as liquidity supplier. Finemetal Asia is responsible for smoothly processing the transaction from producer to customer, i.e. trading and distributing as well as managing the local inventory of physical precious metals.

Argor Heraeus maintains a physical inventory of gold, silver, platinum and palladium in Hong Kong.

This inventory is exclusively available only to Finemetal Asia and is entirely and independently managed and administered by Finemetal Asia.

Finemetal Asia has a power of attorney regarding the inventory. This cooperation between Argor Heraeus and Finemetal Asia enables Finemetal Asia to offer, transact and deliver physical precious metals independently and according to the trade customs in Hong Kong (same day delivery) in particular as well as Asia in general.

Thanks to this cooperation Finemetal Asia acts as liquidity provider and member of the CGSE in the Asian market with the LBMA certified products of Argor Heraeus. Finemetal Asia and Argor Heraeus have entered into a close cooperation agreement in order to supply the Asian market. **Finemetal Asia acts in the market as distributor and reseller exclusively with Argor Heraeus products. This tight cooperation between industrial producer and distribution allows Finemetal Asia to constantly supply physical precious metals to and through the market.**
